

# REFUSE TO SURRENDER TO RHEUMATIC ARTHRITIS

# *Evaluif-10*

## Leflunomide 10 mg Tablets

- ➔ Improves both functional ability & physician-based efficacy measures in patients with RA.
- ➔ Leflunomide has demonstrated efficacy as a monotherapy in psoriatic arthritis & also has a beneficial effect in psoriasis.
- ➔ Retention on treatment with leflunomide is equal to methotrexate & superior to other DMARDs.
- ➔ Leflunomide holds considerable promise as an anti-rejection drug for use in recipients of corneal transplants in whom cyclosporin-A and steroids are contraindicated.
