

## 3 Dimensional Effect of our latest Origin in COPD

# EVALUK-3D

Acebrophylline 200 mg (SR) + Fexofenadine Hydrochloride  
120 mg + Montelukast 10 mg Tablet

### ACEBROPHYLLINE

- \* New generation airway mucus regulator
- \* Better Reduction in the viscosity and adhesivity of the mucus greatly improves ciliary clearance
- \* No side effects induced by xanthine type antitussive
- \* Significant improvement in lung function as mucoreg facilitates biosynthesis of pulmonary surfactants
- \* Reduces the use of short acting  $\beta$ 2 agonist inhalers
- \* Better Anti-inflammatory effect
- \* Prevents exacerbations

### FEXOFENADINE HCL

- \* Potent antihistaminic used to relieve allergy symptoms
- \* It works by blocking a certain natural histamine that your body makes during an allergic reaction

### MONTELUKAST

- \* Potent leukotriene receptor antagonist
- \* Relieves the symptoms of indoor and outdoor allergies
- \* FDA approved for exercise induced bronchoconstriction

## INDICATIONS:-

Chronic Bronchitis

Bronchial Asthma

Bronchial Hyper Responsiveness

Sneezing Runny Nose

COPD

Itchy & Watery Eyes

*Breathe Easy With.....* **EVALUK-3D**
