

**When a life
depends on you.
What do you
depend on ?**

FEXONE-SB **Inj.**

Ceftriaxone 1000 mg & Sulbactam 500 mg Injection

Ceftriaxone 1000 mg Injection

Ceftriaxone Sodium

Parenteral third generation Cephalosporin
First Choice for empiric antimicrobial action

Sulbactam

Broader spectrum B-lactamase Inhibitor than Clavulanic Acid.
Sulbactam binds with penicillin binding proteins & sensitive strains.

Thus they are more susceptible to
Sulbactam Ceftriaxone combination than Ceftriaxone .
