

Give Healthy life to BPH patients...

Benign prostatic hyperplasia (BPH)

is the most common cause of LUTS in elderly **men over 70 years of age.**

Siflow-8

Silodosin8 mg

- ◆ Selective alpha 1-A receptor antagonist which are primarily located on bladder neck and urethra.
- ◆ Works by relaxing muscles in the prostate and bladder, helps to improve urine flow and reduce symptoms of BPH acts as an α_1 -adrenoceptor antagonist with high uroselectivity (selectivity for the prostate).
- ◆ More effective for treatment of BPH.

Siflow-D

Silodosin 8 mg & Dutasteride
0.5 mg Capsules

Alfa-blockers are now considered as **first-line drugs** in the medical management of BPH
